

# RD&T training

## Training:

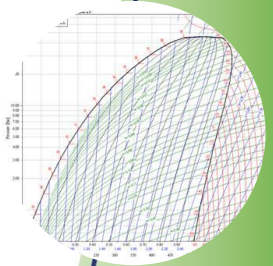

- Flexible
- Bespoke
- Practical

## Course structure:

- Training can be carried out at RD&T's facilities or at the customers' premises
- Practical training can be carried out using equipment at RD&T
- Courses can be flexible and scheduled to suit customers' needs

## RD&T offer a range of courses including:

- Understanding refrigeration test standards
- Compliance with ECA (Enhanced Capital Allowance) scheme
- Refrigeration system component selection
- Optimising integral refrigeration systems – charge optimisation, capillary sizing and selection
- Common issues with air flow design and optimisation in refrigerated cabinets
- Using CFD to aid design and optimisation of refrigerated cabinets
- Reducing energy used by refrigerated cabinets
